The above analysis shows capital gain is 36.36%, return is 24.72%, safety is 20.69% and secured future is 20.25% for the purpose of investment. So maximum respondents are preferring capital gain over other factors and preference is regular income.

Interpretation :-

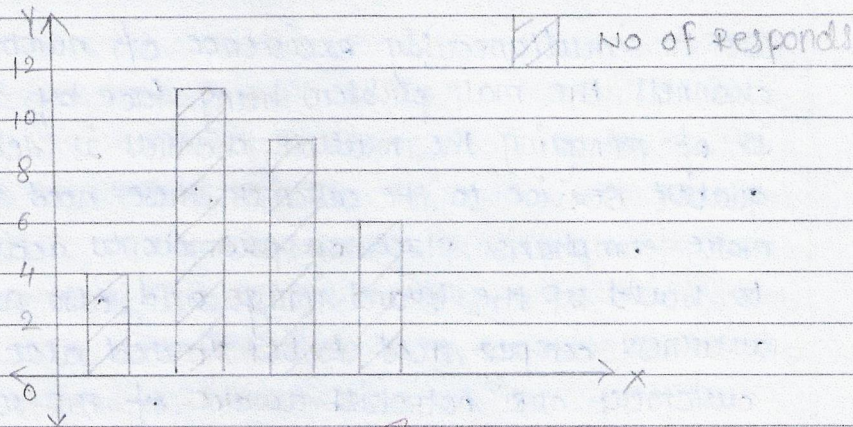

after analyzing the responds query maximum of the respondent consider the return potential of SBI multi fund are the main reason of their investment as some of the equity scheme have performed exceedingly well and have beat the respective benchmark by wide margins. equity scheme like magnum comma fund, tax gain and magnum balance fund have won ICRA award because of good perform

Interpretation:

on the basis of above analysis more number of investor is preference for investing through system invest plan (SIP) on the age group of 31-40

VIII) Investment by aware of people

Interpretation:

if we took at total population only 60% people are aware of mutual fund. but one important things here is that the entire 60% do not have investment in mutual fund. out of these 38% public has investment in mutual fund and the remaining 62% public do not take risk or they do not know the procedure of investment in mutual fund or they do not know how to get liquidate it and how they will be benefited.

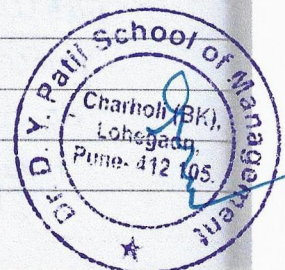

7. conclusion :-

due to simultaneously existence of numbers of channels the main problem being face by AMC is of managing the multiple channels is delivering quality service to the customer. These need to be more emphasize place on promotional activities to build up the brand image and also product awareness compaign need to be started alot of customers are not still aware of the range of option available under MF and still look at it as equity base investment.

in conclusion of product like MF with very low brand appeal and compsupition value will have to depend heavily on distributor to push their product through as very they cannot differentiate themselves from their competitors and being in margins to the business. Indeed mutual fund may represent the only opportunity in which the investor can invest in an intelligent diversified fashion in securities of uprisng sectors.

Date:- 3rd August 2022.

Introduction: -

As part of the curriculum for MBA college students, a problem-solving activity was organized to provide hands-on experience in income tax return filing. This activity aimed to bridge the gap between theoretical knowledge and practical application by immersing students in real-world scenarios. Conducted at a Chartered Accountant (CA) office, the activity offered students an opportunity to understand the complexities of tax filing and gain insights into professional practices.

Objectives of Problem-Solving Activity:-

1. To get the opportunity to work on income tax filing.
2. The aim is to equip students with practical insights and problem-solving skills essential for addressing real-world tax-related challenges.
3. To visit a Chartered Accountant office where students will observe and learn about the process of income tax return filing firsthand.
4. Visit will offer valuable insights into the professional practices and procedures involved in tax compliance.

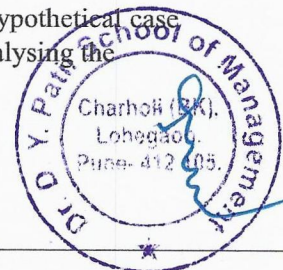

Execution of Activity:-

It was mandatory for all Finance students to participate in this activity as part of their curriculum requirements. Attendance was being taken, and active participation is expected.

Faculties instructed students to come prepared with any relevant materials or questions they may have regarding income tax filing.

The activity commenced with an introductory session where students were briefed about the importance of income tax filing and its implications for individuals and businesses. They were given an overview of the documents required for filing tax returns and the various forms involved in the process.

Following the introduction, students were divided into groups and assigned hypothetical case studies simulating different income scenarios. Each group was tasked with analysing the

given case study, identifying relevant income sources, deductions, and exemptions, and preparing the necessary documentation for filing income tax returns.

Guided by experienced Chartered Accountants, students delved into the intricacies of tax laws, explored strategies for minimizing tax liabilities, and learned about compliance requirements. They were encouraged to ask questions, seek clarification, and engage in discussions to deepen their understanding of the subject matter.

Key Learning Outcomes:

Practical Application of Tax Laws: By working on real-life case studies, students gained practical insights into the application of tax laws and regulations. They learned how to interpret tax provisions, calculate taxable income, and navigate through the complexities of tax codes.

Documentation Skills: Through hands-on experience, students honed their documentation skills by preparing income statements, balance sheets, and other relevant documents required for tax filing. They understood the importance of maintaining accurate records and adhering to compliance standards.

Problem-Solving Abilities: The activity fostered students' problem-solving abilities as they encountered various scenarios that required critical thinking and analytical skills. They learned to identify tax-saving opportunities, evaluate different tax planning strategies, and make informed decisions to optimize tax outcomes.

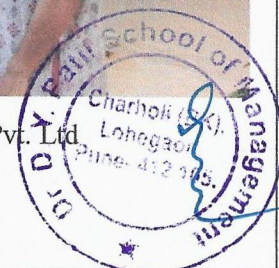

Collaboration and Communication: Working in groups encouraged collaboration and communication among students. They shared ideas, debated strategies, and collaborated to develop comprehensive tax filing solutions. Effective communication with Chartered Accountants further enhanced their learning experience.

The problem-solving activity on income tax return filing at a Chartered Accountant office provided MBA college students with a valuable opportunity to apply theoretical knowledge in a real-world setting. By engaging in hands-on exercises, students gained practical skills, enhanced their problem-solving abilities, and developed a deeper understanding of taxation concepts. The activity underscored the importance of experiential learning in preparing students for professional challenges in the field of finance and accounting.
